

Safety Products You Can Trust

Production Models

1761

The 1761 is a single action WOCD. This device is designed to fit into the stile of an opposing sash and is engineered for insertion directly into a standard vent stop slot. With a housing that will fit any wall thickness from (0.05") to (0.13"), the 1761 is the most versatile WOCD on the market. The 1761 can be installed both in the factory and in the field in just a few seconds.

Patented & Patents Pending

1773

The 1773 is a single action WOCD. The 1773 has all of the same attributes as the 1761 but is designed with a longer tongue to accommodate sash configurations with a larger distance between the two sashes. The 1773 can also be installed both in the factory and in the field in just a few seconds.

Patented & Patents Pending

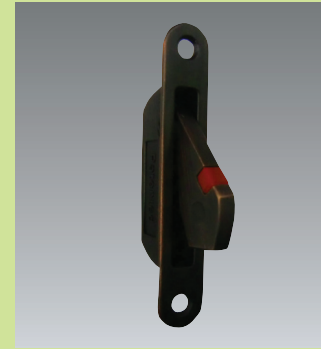

1772

The 1772 is another single action WOCD. Having the same function as the 1761, the 1772 was engineered to fit directly into another industry standard vent stop slot. With its narrow design, the 1772 will easily install into most profiles making it the perfect choice for the narrowest sash surfaces. The 1772 can be installed both in the factory and in the field in just a few seconds.

Patented & Patents Pending

1766

Our 1766 is also a single action WOCD. The 1766 is engineered to install using two screws that securely anchor the device onto a wood, composite, fiberglass or aluminum window sash. The 1766 is constructed of zinc and can be powder coated or plated to meet all of your finishing requirements. The 1766 can be installed in the factory as well as in the field.

Patented & Patents Pending

1775SM

Our 1775SM is a single action WOCD designed to install directly to the window jamb extension or return and interact with the active sash of any hung or sliding window. This device comes with mounting hardware to assure proper installation and is available in right & left handing. The 1775SM was designed to be applied in the field or in the factory.

Patented & Patents Pending

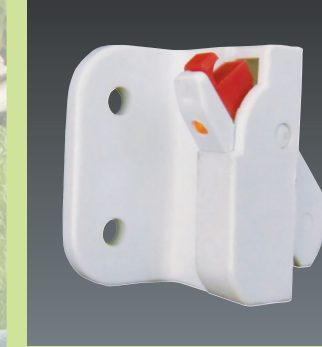

1779FM

Our 1779FM is a dual action WOCD designed to install directly to the face of the window jamb and interact with the active sash of any hung or sliding window. This device comes with mounting hardware to assure proper installation and is available in right & left handing. The 1779FM was designed to be applied in the field or in the factory.

Patented & Patents Pending

1779SM
